| 2 | M/s Baxalta BioScience India Pvt. Ltd. | <p>"Factor VII Plasma Derived Injection" is not manufactured or marketed by any company in India or globally hence, we request you to amend it. For managing Inhibitors, we would request you to replace this by "Activated Prothrombin Complex Concentrate-500U Injection". As you have invited bid for Factor VIII & Factor IX which will address the need of patients suffering from Hemophilia-A and Hemophilia-B. While these patients are treated with factors there is a possibility 25-30% of them develops neutralizing antibodies(Inhibitors) against Factor VIII & IX. In such a scenario, it is very difficult to control severe bleeding of these patients with Inhibitors & at times it can be life-threatening, like in case of CNS bleed or GI bleed. Hence, to address the need of such patients we</p> | <p>Tendered Product List:- ANNEXURE-INIT Sl. No. 30 - Factor VII Injection Plasma Derived Vial20Vials/Box NIT Sl. | | <p>would like to request you for making Haemophilia treatment options more comprehensive in the state by adding "Activated Prothrombin Complex Concentrate-500U Injection". Many states in India are already providing Inhibitor treatment like Rajasthan, Uttar Pradesh, Punjab, J&K, Uttarakhand, Assam, West Bengal, Tamil Nadu, Karnataka, Kerala, Maharashtra, Gujarat & many more.</p> | | |
| | <p>B] NIT says Quote" Pack Size 20 vials/Box" Unquote As an importer our all Anti-Haemophilic products are imported in different pack sizes. Being cold chain products, it would not be possible for us to alter the pack sizes and packing of any of the product as because all the product vials are packed in a mono carton and size of mono cartons depends upon the accessories we provide along with the standard pack. Not only this, you will appreciate that all these products are temperature sensitive and to maintain cold chain during transportation we have validated thermal boxes which are further packed in corrugated boxes. Hence, we would request you to please give flexibility in pack sizes for all Anti- Haemophilic products.</p> | <p>Tendered Product List:- ANNEXURE-I NIT Sl. | | | <p>like Anti Haemophilic Factors other state & national tenders also accept residual shelf life in the range of 50-60%. (3/5th of total shelf life) Supply can be done with a declaration from the supplier for replacement of expired stock with the fresh stock at no extra cost. Such declaration can be provided on non-judicial stamp paper.</p> | | |
| 3 | M/s Cyano Pharma (P) Ltd | <p>Please refer the above stated tender inquiry in which the packing of IFA Tablets (Tender Sr. No. 25&26) is mentioned as Aluminium Strip packing. In this connection, we enclose herewith a copy of guidelines dated 20th June 2019 of DGHS, MoHFW, New Delhi indicating to use Blister Packing instead of Aluminium pack for IFA Tablets for better drug stability. Hence we would request you to change the packing of above stated IFA Tablets from Aluminium Strip to BLISTER PACKING and necessary corrigendum may be issued in this regard so that we can quote our rates accordingly.</p> | <p>Tendered Product List:- ANNEXURE-INIT Sl. | 4 | <p>Novo Nordisk India Pvt. Ltd.</p> | <p>1. The dosage of FVIII is calculated as per the body weight of the patient and the desired plasma level of FVIII. This desired level depends on the type of bleeding - joint bleeds required less plasma level and a serious bleed like intracranial (IC) bleed requires much higher levels.</p> <p>2. Early and optimum dosage has been recommended by WFH for treatment of acute bleeding in hemophilia. Even in adults, an optimum dose for patients weighing 60 kg even for a mild joint bleed will be 1000 IU (4 vials of 250 IU vs 1 vial of 1000 IU). Since FVIII is given as an IV infusion, mixing and administration of a single dose from multiple vials is not feasible in an emergency.</p> <p>3. Correct doses are also required for initiating prophylaxis - only easy administration can ensure compliance and adherence to long term therapy.</p> <p>4. Easier storage (less requirement of refrigerated storage space - many factors need to be stored under refrigeration and some at <40 C), better utilization within the shelf life.</p> <p>5. Proper accountability and lesser wastage due to optimum dosage.</p> <p>Looking at the above advantages and considering the benefits that would accrue to the Government, we request your good self in kindly considering including recombinant anti-hemophilic factor- VIII with higher vial strength (1000 IU & 2500 IU) in the ongoing published tender referred above. In addition, the specification for FVIII injection - recombinant 250 and 500 (item no. 27 & 28) include "20 vials box".
